

Fitting Guide, Beaded & Picture Frame Panels

Beaded Frame

Beaded Framed Access Panels require an unfinished wall or ceiling for installation. By plastering the panel in to the wall or ceiling an elegant, clean look is achieved with the aperture.

1: Cut the plasterboard to the aperture

3: Use the pre-punched side and flange fixing holes

5: Skim over the beaded frame

7: Ceiling second coat and polish

2: Offer the panel to the hole

4: Tape the ceiling

6: Finished first coat

8: Clean out the plaster from between the door and the frame before emulsioning over ceiling and door face.

Picture Frame

Picture Frame Access Panels are the perfect access solution in situations where your walls and/or ceilings have already been finished. They create a neat and tidy access point with very little fitting effort.

1: Prepare the hole in the wall or ceiling

3: Take care to ensure the panel fits in to the hole

 Hold the panel in place and use the pre-punchedfixing holes on the side of the frame to secure

For more information please call us on **01724 853090** or visit our website **www.accesspanels.co.uk**

2: Offer the panel to the hole

4: Ensure the picture frame sits flush with the wall or ceiling

6: Complete
